Non-Standard Lighting Incentives for Business Program

The Non-Standard Lighting Incentives for Business Program from Ohio Edison, The Illuminating Company, and Toledo Edison, FirstEnergy's Ohio utilities (FirstEnergy) offers incentives and information to encourage participants to install high-efficiency lighting equipment. The program is funded by Ohio Edison, The Illuminating Company, and Toledo Edison nonresidential electric utility customers in Ohio in accordance with Senate Bill 221.

Effective Dates

To qualify for incentive levels on this application form, equipment must have been purchased on or after April 11, 2011 and must be installed by October 11, 2011.

Eligible Participants

The Non-Standard Lighting Incentives for Business Program is available to commercial and industrial retail service customers of Ohio Edison, The Illuminating Company, and Toledo Edison. In addition to retrofits, new construction projects and the portion of building addition projects that increase a facility's footprint are eligible for Non-Standard Lighting incentives.

Pre-Approval Requirements

Non-Standard lighting projects will require pre-approval before the purchase and installation of equipment if the total incentive requested is greater than \$3,000.

All participants are encouraged to seek program approval for their proposed new lighting equipment prior to purchase to ensure it meets program requirements and is eligible for incentives.

Existing Facilities vs New Construction

Existing facilities and new construction projects, as defined above, are eligible for these incentives. Existing facilities should consider the currently installed equipment when calculating the baseline energy usage. New construction projects should follow applicable building energy construction case when calculating baseline energy use.

Limitations

All incentives available from FirstEnergy's commercial and industrial program are limited to the total project cost.
